

Your Trusted Partner— Simplifying Your Clinical Supply Chain

What are your biggest challenges in clinical supply chain management? Are you tired of delays caused by supply shortages or poorly planned operations? Have these setbacks jeopardized your Site Initiation Visit (SIV) or dosing schedules, costing you time and resources?

Streamline Study Start-Up— Avoid Delays and Save Costs.

With the cost of clinical trial delays at approximately \$600,000 (and potentially \$8 million) per day¹, the importance of the right forecast cannot be ignored. Our experts help you with:

- Protocol interpretation and optimization
- Kit design
- Drug and ancillary supply forecasting
- SOP development
- Comparator and ancillary sourcing
- Clinical supply logistics strategy and management
- Label text and packing development and management, including QA/QP release
- Distribution/depot network set-up
- Clinical supply documentation to meet regulatory guidelines

How CSC Can Help You.

At Clinical Supply Consulting (CSC), we understand the importance of smooth trial operations. Composed of industry leaders with more than 150 years of combined experience, we align with your goals to minimize disruptions and maximize study success.

We prioritize your needs by offering expertise in managing Phase I-IV clinical studies at all levels of complexity, with meticulous IRT set-up and management, strategic forecast planning to optimize drug availability, and effective project lifecycle management.

What We Deliver for You.

Drawing from experience as sponsor representatives, CRO managers, and specialty service providers, we support you through each stage of the clinical supply chain—from initial setup to final drug product reconciliation and study closeout activities. We ensure your IRT system is optimized and manage it throughout the study lifecycle. We understand the intricate demands of global trials and set you up for success.

IRT Experts That Keep Your Study on Track.

Who has time to navigate through extensive system requirement documents? Let CSC take the lead in simplifying your IRT management process, including:

- Recommend optimal IRT vendor
- Manage IRT study build process
- Lead User Acceptance Testing (UAT) of system
- IRT management throughout study lifecycle
- Manage improvements throughout study, as needed, to maximize efficiencies

Optimize Your Clinical Trial Supplies with Efficiency in Study Conduct.

At CSC, we work closely with your team to develop and manage a clinical forecast that enables us to optimize inventory management, shipping, transfer costs, and dispensing fees, including:

- Continuous drug supply forecast to maximize product and minimize waste
- Vendor management
- Import/export coordination
- Expiry date extension/re-labeling
- Distribution/depot network management
- Temperature excursion management and reporting
- Budget management and reporting

Manage Your Study Closeout with Certainty.

As your clinical trial ends and sites prepare for closure, trust us to orchestrate the close-out activities, with efficiency, certainty, and GCP compliance, supporting:

- Management of study closeout in preparation for NDA submissions
- Drug product returns, reconciliation, and destruction
- Vendor contract closeout
- Final budget reporting

Partnering with CSC has helped improve our digital footprint in the clinical trial efforts. Their in-depth knowledge of clinical supply chains helped reduce hurdles and ensure a smooth flow of materials. This efficiency allowed for a more streamlined trial process, enabling us to explore additional solutions with CSC and ultimately, improve trial quality.
